

April 2006 Procurement Questions
Relevant to the Buy American Provision

Purpose:

Address questions and issues regarding Buy American

Scope:

Participants in the Child Nutrition Programs

Description:

Question #1: What are the requirements of the Richard B. Russell National School Lunch Act's (NSLA) Buy American provision that the School Food Authority (SFA) must follow when purchasing food and food products for the use in the Child Nutrition Program?

Answer: Section 104(d) of the William F. Goodling Child Nutrition Reauthorization Act of 1998 (Public Law 105-336) added a new provision, Section 12(n) of the NSLA (42 USC 1760(n)), requiring SFAs to purchase domestically grown and processed foods, to the maximum extent practicable. Purchases made in accordance with the Buy American provision must still follow applicable procurement rules calling for free and open competition.

Question #2: How would an SFA determine it's a "domestic commodity or product"?

Answer: Section 12(n) of the NSLA defines "domestic commodity or product" as one that is produced and processed in the United States substantially using agricultural commodities that are produced in the United States. One of the reports accompanying the legislation noted that "substantially" means that over 51% of the final processed product consists of agricultural commodities that were grown domestically.

Question #3: Are there any exceptions to the Buy American Provision?

Answer: Yes. While rare, two situations which may warrant a waiver to permit purchases of foreign food products include: 1) the product is not produced or manufactured in the U.S. in sufficient and reasonable available quantities of a satisfactory quality; and 2) competitive bids reveal the costs of a U.S. product is significantly higher than the foreign product.

Question #4: Does the “BUY American” provision apply to entities that purchase on behalf of an SFA, such as a purchasing cooperative or a food service management company?

Answer: Yes. Any entity that purchases food or food products on behalf of the SFA must follow the same “Buy American” provisions that the SFA is required to follow.

Question #5: Does the “Buy American” provision apply only to purchases made using Federal funds under the Child Nutrition Programs?

Answer: No. SFAs must ensure that all procurements using funds from the nonprofit school food service account comply with the Buy American provision. Pursuant to Child Nutrition Program Regulations, all Federal funds, all money received from children as payment for program meals, all proceeds from the sale of competitive foods, and all other income generated by the school food service must inure to the food service account. As a consequence, the entire nonprofit school food service account becomes subject to Federal procurement standards.

Question #6: What can an SFA do to comply with the requirements of the Buy American provision?

Answer: There are a number of ways an SFA can comply with the provision. SFAs should be including a Buy American clause in all product specifications, bid solicitations, request for proposals (RFPS), purchase orders, and other procurement documents issued. Additionally, SFAs are required by 7 CFR 3016.36(b)(2) to monitor contractor performance to ensure compliance with all contractual requirements, including the Buy American provision. SFAs can also ask their suppliers to provide certification as to the origin of the product which is discussed in more detail in question #9.

Question #7: How should an SFA determine the country of origin for an end product?

Answer: For manufactured end products, there is a two-part test to define end product: 1) the article must be manufactured in the U.S.; and 2) the cost of domestic components must exceed 50% of the cost of all of the components. It is not enough to assume that a product with a well recognized American brand name or product supplied by a domestic foodservice distributor complies with the Buy American provision. SFAs should inquire further with their suppliers to determine the country of origin for an end product because some products sold in school meals may carry the name brand of a domestic company, but the product itself may derive from another country. SFAs should also examine product packaging as the Nutrition Labeling and Education Act of 1990 mandates that the country of origin for both domestic and imported food products be identified on the product labels.

Question #8: Should SFAs rely on the distributors’ reliance on information from American suppliers about the amount of domestic content in the parts, components, and other elements they buy and use for their final products?

Answer: According to the Federal Trade Commission, if given in good faith, entities can rely on information from foodservice distributors about the domestic content in the parts, components, and other elements contained in the product. However, rather than assume that the input is 100 percent U.S. made, SFAs would be wise to ask the supplier, i.e., manufacturer or distributor, for specific information about the percentage of U.S. content. SFAs can include in their bidding process a requirement for certification along the lines of: “We require that suppliers certify the percentage of U.S. content in product supplied to us. If you are unable or unwilling to make such certifications we will not purchase from you”. Appearing under this statement could be the sentence, “We certify that our _____ have at least ____% U.S. content” with space for the supplier to fill in the name of the product and its percentage of U.S. content.

Question #9: Doesn't this place some of the burden on the manufacturers and distributors of food and food products in the Child Nutrition Programs?

Answer: Yes. The ability to certify, as required by the terms of the contract with the SFA, will require that manufacturers and processors look far enough in the manufacturing process to be reasonably sure that any significant foreign content has been identified.
